PERSONNEL COMMITTEE REPORT

December 2013

New Hire

Peng Li joined the Wastewater Treatment Utility as Laboratory Manager on December 26. The Laboratory Manager was vacated in October when Stephen Nelson was promoted to Operations Supervisor. Peng has more than five year's laboratory experience in water quality and waste management at the University of Illinois. She also served as the project leader for two wastewater treatment research projects during her PhD study. The City is very fortunate to have her experience and technical expertise in this important position.
