

Wastewater Utility Green Power Report

March 2012

Electricity Generated in March: **76,378 kWh (kilowatt hours)**

This amount of electricity would have cost **\$5,346** if it had been purchased from Duke Energy.

11,191 gallons of grease were processed in our digesters for the month.

39 tons of food scraps were processed this month.

22% of our plant's power was generated on-site this month.

The City of West Lafayette's Wastewater Utility has pledged to generate at least 10% of its electricity on-site in 2012 as Indiana's first wastewater plant to become an EPA Green Power Partner.
