

## **West Lafayette Public Library plans for re-opening the library building for the community**

The staff of the West Lafayette Public Library look forward to reopening the Library building for our community. As we do our planning, the safety of our Library staff and patrons are key to re-opening the Library building and so we are following the guidelines published in the Indiana Governor's "Back on Track Indiana" plan.

As the first phase of re-opening the building, the Library will begin a curbside "contactless" pickup service so that library patrons can pick up library books, audio books, DVDs and other materials. This service may begin as early as late May; please watch the Library's website and our Facebook page for announcements about the start date and procedures for the new contactless pickup service.

While the Library building is temporarily closed the Library offers 24/7 electronic services that include eBooks, eAudiobooks, eVideos and other online resources – please visit the library website for access including the option of obtaining an "e-Library card" for use during this public health emergency.
